

CLIENT COMPANY SPOTLIGHT

Mango Tree, Newest Mac-OU INC Tenant Company

The Macomb-OU INCubator is pleased to announce their newest tenant client, MangoTree Capital, LLC (MTC). MTC is a Registered Investment Adviser* firm launched in June 2012 offering investment advice and portfolio management. MTC's mission is to provide stable and enjoyable investment experience by integrating client goals with disciplined portfolio management while maintaining maximum account transparency through client account custody at an independent broker/dealer. They consider risk management and return equally important in pursuit of growth and income of assets.

"In looking for an office for the new company, from initial due diligence to selection of office space and incubator services, Julie Gustafson, Wayne Blizman and the entire staff were very sensitive and flexible to my needs and requirements for the business launch," says Satish Dharwadkar, President and Portfolio Manager at MTC. "MangoTree Capital, although a financial services company, has deep roots in technology through its quantitative models and envisions that the Macomb-OU INCubator services will help 'productionize' it for MTC employees' use while protecting intellectual property. I also plan to have MangoTree Capital become a 'go to' place for getting answers about general questions concerning markets, investment, portfolio and retirement plans."
